

Disc Golf Design & Layout

The City of Kyle and Steeplechase Park has an 18 hole, double tee-box, disc golf course. John Houck, a two-time world champion, designed and supervised construction of the course. The historic Plum Creek crosses the course many times and will challenge any level of player. The tee boxes are constructed with pervious concrete. In Fact, this course will be the first course ever to use pervious concrete for tee boxes. There are two tee boxes for each hole. Each hole will have 2 basket sleeves to keep the grounds in good shape.

The first rounds were played in February, 2006 and weekly mini's are played by many.

There is a "Driving Range" with pervious concrete surface to help warm up and practice your game. Distances range between 100' feet to 400' feet to test your distance and accuracy.

('measured from front-center point of concrete surface)

Also, this course offers you two "Practice Holes" to work on your short game and putting skills.

You won't find another Disc Golf Course anywhere that provides the challenges, design, construction and amenities as Steeplechase Park.

Come out and play... enjoy the course.

Caution: Poison Ivy currently on portions of course. Until Poison Ivy can be treated and under control, caution is highly advised.
