

CHECKLIST FOR RESIDENTIAL BUILDING PERMIT APPLICATION

All plans must be accompanied by a completed **Permit Application with a person's name legibly printed**, signed, and dated by the applicant and a written **Scope of Work** narrative.

PERMITS (as applicable)
 Projects meeting the design requirements by a state licensed Architect
must be sealed and dated.
 Projects meeting the design requirements by a state licensed Professional
Engineer must be sealed and dated.

This checklist is designed to help ensure accurate and correct information is submitted for review. Please review the currently adopted codes and amendments in the jurisdiction in which you are applying for a permit.

SITE PLAN: Full sets must be drawn to scale with the following details:		
	Utility Easements Street Right of Way	
	Setbacks	
	Dimensions locating proposed structures.	
	Vehicular street accesses (Driveways)	
	Surveyed grade elevation of highest point (Note as Benchmark Elevation 100')	
	First Floor Elevation (Relative to Benchmark)	
	Slope of grades showing General Drainage	
	DPLAIN / FLOODWAY & REPORT, if required	
	Boundaries of all FEMA designated flood plains affecting the project. Indicate FIRM Base Flood Elevation and finished floor elevation (BFE + 2')	
	freeboard) for each structure and utility, if applicable.	
	Indicate whether structures and utilities will be elevated, or flood proofed,	
	if applicable.	
	Initial Elevation Certificate based on construction drawings sealed, signed	
	and dated by a registered land surveyor, if applicable.	
	ING PLANS: Full sets must be drawn to scale with the following details: Front, Rear and Side Elevations	
	Exterior finish	
	Roof layout with all hips, valleys and ridges shown and pitches labeled.	
	Layout of each floor with all rooms labeled.	
	Location of all plumbing fixtures, including future fixtures and water heater.	
	Location of condensing unit(s)	
	Door sizes and swing are shown.	
	Window sizes and type are shown (identify safety glazing where required by Code – sizes must match REScheck report).	
	Hearth, fireplace, and chimney shown. Dimension chimney height in accordance with IRC.	
	Attic access size and location	
	Wall section with insulation shown for roof, walls, and floor as applicable – must match REScheck report.	

STRUCTURAL PLANS: Full sets must be drawn to scale with the following		
details:		
 Foundation Plan designed by a registered professional engineer. 		
 Roof and ceiling framing layouts and details (lumber size, species, and grade) showing all locations. 		
☐ Floor and Roof design (trusses) must be available at time of inspection.		
□ Wind Brace Plan		

ENERGY COMPLIANCE DETAILS

- □ Submit a passing energy compliance report prepared in accordance with the City's current adopted IECC, like REScheck or IC3.
- ☐ Manual J & S & D with ACCA approved software required for new homes and some major remodels.
 - Manual J report calculating all heating and cooling loads for all new SF Residences
 - Manual S report sizing all heating and cooling equipment based on loads calculated by Manual J
 - Manual D report indicating heating and cooling equipment duct sizing is in accordance with the load calculations and equipment sized in the Manual J & S.

ELECT	TRICAL DETAILS
	Main Disconnect and Breaker panel location is indicated.
	All lights, switches, and receptacles shown.
	GFCI receptacles indicated.
	Arc-Fault circuit protection indicated.
	Waterproof / GFCI receptacles shown at exterior.
	Smoke detectors, Carbon monoxide alarms, and required ventilation shown.
	Ventilation shown for all bathrooms, water closets and other similar rooms.

PLAN CHECKLIST FOR OTHER PROJECTTYPES

ADDI	TIONS, ALTERATIONS, & REMODELS
	Demolition Plan where applicable.
	Architectural Existing Floor Plan and Proposed Floor Plan, Elevation
	drawings and Wall Section details where applicable.
	Engineered Foundation Plans and Details where applicable.
	Special Inspections Sheet
	Framing Plans for Floor, Ceiling, and Roof
	Code Matrix / Means of Egress / Life Safety Plan
	Finish Schedule
	Fire Rated construction details where applicable.
	MEP Plans, Schedules, and Details
	REScheck reports where applicable.
	Heating and Cooling Load calculations where applicable.
	S: Plans, Details and Construction Documents must comply with the city
	ted International Swimming Pool and Spa Code (ISPSC) and the National
Electi	ric Code (NFPA 70).
	Permit Application
	Scope of work, including Pool Classification and Pool Type
	Site Plan* showing all existing structures and proposed Pool location.
	Swimming pool, spa, and hot tub construction plan and specifications
	shall include dimensioned plans for all decks, mechanical equipment, and
	fencing.
	Structural Plan must include:
	 Type of construction (gunite, poured concrete, etc.)
	 Dimensions of pool, including depth and adequate cross-sections
	drawn to scale.
	 Pool layout with all sizes shown and material to be used.
	 Location of the main outlet, surface simmers, and inlets.
	 Pool edge details, indicate if any pool walls are 4' or greater from
	the bottom of the footing to the top of the wall.
	Mechanical Plans must indicate:
	 The volume, system flow rate in gallons per minute, and turnover in
	hours.
	 The type and size of filtration.
	The type and size of pool / spa heater.
	The pool / spa layout with all sizes shown and types of materials to
	be used, location of main outlet, surface skimmers, and inlets.
	 The size and length from source to heater and routing of gas line, if
	applicable.
	Pool Barrier details
	Deck plans and details, as applicable.

MANUFACTURED HOME – HUD** OR TDLR IHB***
☐ Site Plan* showing all existing structures and proposed Manufactured
Home.
☐ HUD or TDLR IHB Data Plate paper graphite rubbing or picture.
 Manufactured Home Anchorage and Foundation Plans and Details by a state licensed Structural Engineer.
☐ Identify the Electric Source (Underground or Overhead Electric), location
of the Meter Base and Main Disconnect
 Identify if Natural Gas is used. A GasTest is required.
☐ Trenches (Underground Electric, Water, Sewer and/or Gas) must remain
open for inspection.
☐ Metal frame must be bonded to the electrical system.
 Permanent address posted visible from the street. Must comply with Fire and EMS requirement.
and Eivio requirement.
MOVING A HOME INTO A CITY
☐ Site Plan* showing all existing structures and proposed Home.
☐ Verification from Third-party Inspection service that the Home complies
with the city adopted IRC and IECC.
Foundation Plans and Dataila by state licensed Ctrustural Engineer
 Foundation Plans and Details by state licensed Structural Engineer.
- Foundation Flans and Details by state licensed Structural Engineer.
SOLAR ARRAY
SOLAR ARRAY
SOLAR ARRAY ☐ Site Plan* showing all existing structures and proposed Solar Array for ground mounted systems. ☐ Panel layout showing the proposed panels in relation to all hips, valleys,
SOLAR ARRAY Site Plan* showing all existing structures and proposed Solar Array for ground mounted systems. Panel layout showing the proposed panels in relation to all hips, valleys, ridges, and eaves for rooftop systems.
SOLAR ARRAY □ Site Plan* showing all existing structures and proposed Solar Array for ground mounted systems. □ Panel layout showing the proposed panels in relation to all hips, valleys, ridges, and eaves for rooftop systems. □ Solar Array Plans and Specs, including Grounding system.
SOLAR ARRAY Site Plan* showing all existing structures and proposed Solar Array for ground mounted systems. Panel layout showing the proposed panels in relation to all hips, valleys, ridges, and eaves for rooftop systems. Solar Array Plans and Specs, including Grounding system. Identify if Grid-Tied or Standalone system.
SOLAR ARRAY □ Site Plan* showing all existing structures and proposed Solar Array for ground mounted systems. □ Panel layout showing the proposed panels in relation to all hips, valleys, ridges, and eaves for rooftop systems. □ Solar Array Plans and Specs, including Grounding system. □ Identify if Grid-Tied or Standalone system. □ Modules conform to and are listed under UL 1703.
SOLAR ARRAY □ Site Plan* showing all existing structures and proposed Solar Array for ground mounted systems. □ Panel layout showing the proposed panels in relation to all hips, valleys, ridges, and eaves for rooftop systems. □ Solar Array Plans and Specs, including Grounding system. □ Identify if Grid-Tied or Standalone system. □ Modules conform to and are listed under UL 1703.
SOLAR ARRAY Site Plan* showing all existing structures and proposed Solar Array for ground mounted systems. Panel layout showing the proposed panels in relation to all hips, valleys, ridges, and eaves for rooftop systems. Solar Array Plans and Specs, including Grounding system. Identify if Grid-Tied or Standalone system. Modules conform to and are listed under UL 1703. Mounting System in compliance with UL 2703.
SOLAR ARRAY Site Plan* showing all existing structures and proposed Solar Array for ground mounted systems. Panel layout showing the proposed panels in relation to all hips, valleys, ridges, and eaves for rooftop systems. Solar Array Plans and Specs, including Grounding system. Identify if Grid-Tied or Standalone system. Modules conform to and are listed under UL 1703. Mounting System in compliance with UL 2703. Analysis by Structural Engineer certifying the solar panels, components
SOLAR ARRAY Site Plan* showing all existing structures and proposed Solar Array for ground mounted systems. Panel layout showing the proposed panels in relation to all hips, valleys, ridges, and eaves for rooftop systems. Solar Array Plans and Specs, including Grounding system. Identify if Grid-Tied or Standalone system. Modules conform to and are listed under UL 1703. Mounting System in compliance with UL 2703. Analysis by Structural Engineer certifying the solar panels, components and their loading on existing and new roofs.
SOLAR ARRAY Site Plan* showing all existing structures and proposed Solar Array for ground mounted systems. Panel layout showing the proposed panels in relation to all hips, valleys, ridges, and eaves for rooftop systems. Solar Array Plans and Specs, including Grounding system. Identify if Grid-Tied or Standalone system. Modules conform to and are listed under UL 1703. Mounting System in compliance with UL 2703. Analysis by Structural Engineer certifying the solar panels, components and their loading on existing and new roofs. BACKUP GENERATORS Site Plan* showing all existing structures and proposed Generator
SOLAR ARRAY Site Plan* showing all existing structures and proposed Solar Array for ground mounted systems. Panel layout showing the proposed panels in relation to all hips, valleys, ridges, and eaves for rooftop systems. Solar Array Plans and Specs, including Grounding system. Identify if Grid-Tied or Standalone system. Modules conform to and are listed under UL 1703. Mounting System in compliance with UL 2703. Analysis by Structural Engineer certifying the solar panels, components and their loading on existing and new roofs. BACKUP GENERATORS Site Plan* showing all existing structures and proposed Generator location.

ACCE	SSORY STRUCTURES: Sheds, ADUs, Gyms, Auxiliary Office Space
	Provide a Scope of Work indicating the proposed use of the structure. Design
	must meet or exceed the minimum city adopted codes. A code review does
	not take the place of a Zoning review. Zoning must be approved by the city
	prior to the code review.
	Site plan, with North arrow, scaled and dimensioned, showing all existing
	and proposed structures, easements, setbacks, and property lines.
	Foundation plan: Slab or Pier and Beam with material specifications,
	dimensions and reinforcement schedule OR anchorage via tie down system,
	and anchor system with spacing shown where applicable.
	Front, Rear and Side Elevations with exterior covering(s) labeled. Flashing
	details are required for Door and Window openings, and Wall/ Roof and
	Roof/ Roof intersections.
	Roof plan with Roof covering material labeled.
	 Layout showing pitch and all hips, valleys, and ridges (if site built).
	Ceiling and roof framing layouts (if site built). Material species of lumber,
	grade, on-center spacing, and span must be shown. Engineered framing
	materials (wood I-joists) must have the manufacturer's literature attached.
	Scaled and dimensioned Floor Plan indicating each floor with all rooms
	labeled, ceiling height(s), windows and doors, attic access, and stairway
	construction, where applicable.
	Fire-resistance rated construction UL Listing and details where required.
	Door sizes and swing are shown with header height, opening width and
	height, and operability shown.
	Window sizes and type are shown (identify Emergency Escape and Rescue
	openings and safety glazing where required by Code – sizes must match
	REScheck report). The insulation shows for the roof wells, and floor where applicable.
	The insulation shown for the roof, walls, and floor where applicable – must match REScheck report.
	Braced Wall Plan (engineered or prescriptive).
П	Electrical Power and Lighting Plans, where applicable, ampere rating of
	panelboard or subpanel, and a riser diagram indicating the method
	(underground or overhead) of running electricity to the new building. If
	adding 500sf or more to the existing building load, a load calculation sheet
	is required.
	Plumbing Plans, where applicable. All Plumbing Fixtures must be shown
	appropriately spaced.
	Mechanical Plans, where applicable. Manual J/ D/ S reports must be
_	included.
	PEMB (Pre-Engineered Metal Building) requires engineered plans.
	REScheck report using the city adopted code as the Basis of Design.

*Site Plan must be scaled and dimensioned, indicate all setbacks and easements. For Swimming Pools, Electric Utility Power Poles, Underground and Overhead Electrical must be shown on the Site Plan.

**HUD-CODE manufactured home is a structure constructed on or after June 15, 1976, according to the rule of the United States Department of Housing and Urban Development, transportable in one or more sections, which, in the traveling mode, is 8 body feet or more in width or 40 body feet or more in length, or, when erected on site, is 320 or more square feet, and which is built on a permanent chassis and designed to be used as a dwelling with or without a permanent foundation when connected to the required utilities, and includes the plumbing, heating, air conditioning, and electrical systems. The term "HUD-CODE manufactured home" does not include a recreational vehicle as that term is defined by 24 CFR 3282.8(g).

***Industrialized Housing is a residential structure that is designated for the use and occupancy of one or more families, that is constructed in one or more modules or constructed using one or more modular components built at a location other than the permanent residential site, and that is designated to be used as permanent residential structure when the modules or modular components are transported to the permanent residential site and are erected or installed on a permanent foundation system. The term includes the plumbing, heating, air conditioning, and electrical system. The term "industrialized housing" does not include any residential structure that is more than three stories or 59 feet in height as measured from the finished grade elevation at the building entrance to the peak of the roof. The term "industrialized housing" does not mean nor apply to: A. Housing constructed of sectional or panelized systems not utilizing modular components; or B. Any readybuilt home which is constructed so that the entire living are is contained in a single unit or section at a temporary location for the purpose of selling it and moving it to another location.
