**Re: City of Kyle Spring Branch Trail and Plum Creek Trail  
Notification of Field Surveying in Your Area**

Dear Resident:

The City of Kyle is excited to inform you that we are commencing the engineering design of the Spring Branch Trail and Plum Creek Trail projects, which will meander through the Spring Branch and Plum Creek greenbelts near your neighborhood. These trails are a significant part of the City-wide Trail System Master Plan.

This letter is to make you aware that field surveying for these important trail projects will be conducted near your home or place of business. The City has secured the surveying and engineering services of Schaumburg & Polk, Inc. (SPI) to assist the City with these projects. In order to complete the engineering design of these projects, it is necessary to perform field surveying of the trail corridor. The field surveying work will be contained within the existing Spring Branch and Plum Creek greenbelts and will utilize the existing road right of ways and drainage easements for access to the project.

There will be no impact to your property. This letter is simply to make you aware that field survey crews will be in your area. Field survey activities will include the use of an Unmanned Aerial Vehicle (UAV - more commonly called a drone). Field surveying will begin the week of February 23rd and will extend for several weeks.

If you have any questions or comments regarding this project, please contact City of Kyle Parks and Recreation at (512) 262-3939, or email at [parks@cityofkyle.com](mailto:parks@cityofkyle.com).

Sincerely,

Mariana Espinoza  
Parks and Recreation Director  
City of Kyle
